Skinman® Rub
Alcohol hand rub

Hand disinfection

Why use Spirigel® or Skinman® Rub?

Decontamination with alcohol significantly improves compliance compared with conventional handwashing.¹

Increased effectiveness when compared with other soaps or antiseptics in reducing the microbial flora colonizing hands.²

Dermatologically tested, with emollient to moisturise the skin.

Convenience of being available at all points of use.

Comprehensive range of support material available.

Skinman Rub is suitable for pre-operative hand rubbing.

Range of mountings and formats to suit all applications

For further information go to www.spirigel.co.uk

Areas of use

Wherever rapid hand disinfection is required.

Bed or trolley mounted.

Wall mounted.

Free-standing.

Personal carried pack.

Microbiological Properties

Effective against a broad spectrum of micro-organisms.

Spirigel is currently tested to prEN 12054, EN 1275, and EN 1500 in 15 seconds.

Skinman Rub is currently tested to EN 1040, EN 1275, prEN 12054, EN 1500 in 15 seconds and prEN 12791.

Spirigel and Skinman Rub are effective against enveloped viruses (e.g. BVDV and vaccinia virus) in 30 seconds according to DVV guidelines.
