

*Step up for a Healthy Skin*

# MEDGUARD®

Professional Healthcare Supplies

## New treatment standards start here.

1

Freezen is born from the widespread adoption that with cryotherapy excellent response to treatment of skin disorders is shown in all cases.

2

The practical implementation is an innovative device to increase an overall improvement of the quality of treatment by the direct application of nitrous oxide at a temperature of  $-89^{\circ}\text{C}$ .

3

The ease of use will be an invitation to GP's, Aesthetic Practitioners, Pediatricians and many other specialists to enhance service to patients.

4

Affordable, quick and easy solution for resolving warts, condyloma, hemangiomas, skin tags, keratoses and all other benign skin disorders.

5

Freezen offers non stress short treatment time with noticeable rapid improvement.

Reassuring Pen-design. Optimal safety with minimal discomfort and no side effects.

Very practical with low priced small cryogen capsules that can treat up to 12 patients.

Our clients love it, and so do we.  
We recouped our initial investment  
in just 60 days !

Freezpen is manufactured by Clinic6. We understand the need for opening new ways to improve the quality of healthcare delivery through our continuous dialogue with physicians and other care providers. We monitor to change customer demands and market trends into practical solutions for everyday use.
